OBJECTIVE

As a highly motivated and enthusiastic Junior Java Developer, I am seeking an entry-level position in a dynamic and challenging work environment where I can utilize my technical skills and grow as a software developer. I am passionate about coding and eager to contribute to a team and expand my knowledge of Java and related technologies.

EDUCATION

Centrul de Excelență în Informatică și Tehnologii Informaționale, Chisinau

Associate degree in Programming and programs analysis

Expected Graduation Date May 2024 | GPA: 9,40/10

SKILLS AND TECHNOLOGIES

- Russian (Native), English TOEFL C1 (110/120), Romanian (Intermediate)
- Git, Maven, IntelliJ, Jira, TeamCity, Docker
- Java Core, Multithreading (Concurrent collections, Patterns)
- Spring Framework (Boot, Web, MVC)
- Spring Security, JWT, OAuth 2
- Spring Data, Hibernate, JPA, Flyway
- SQL (Isolation levels, ACID, Normal forms), Postgres
- JUnit, Mockito, RabbitMQ
- Test Driven Development, Agile Methodology, REST, Understanding of a Microservices architecture
- Pet-projects with Java backend and Angular Tailwind frontend
- Linux, Proxmox, Ubuntu server, Cloudflare Tunnels

WORK EXPERIENCE

Java Internship in Endava

September 2022 – December 2022

- During my internship at Endava, I had the opportunity to work on a REST API for a 'Budget planner' application using Spring Boot, Spring Data, and Spring Security. As part of the development team, I worked on designing and implementing various endpoints for the API, including user registration, login, and budget management.
